

## Enjoy life with Furtners in Pertisau by the Achensee Lake in Austrian Tyrol

Achensee is the largest lake in Tyrol formed by glaciers, 9 km long and 1.3 wide. Water quality is very close to drinking water and we can admire the excellent visibility of water representing more than ten metres. The depth of Achensee - 133 m is great, in summer the maximum temperature will reach only 20 C degrees. For the permanent wind this destination is one of the best spots for surfers. From the main port Pertisau start large excursion ships their round trips and on each stop you can disembark and continue any time later.

Avid golfers come to Pertisau to play golf on a golf course recently awarded the best golf course in Austria. The golf course in the altitude of one thousand metres is excellently incorporated into the high mountains and deep forest. Players, right from the start of their play, will for sure get the feeling that this golf course must be here already from ancient times. Green

fee represents 65 Euro, [www.golfclub-achensee.at](http://www.golfclub-achensee.at) . Very close to the first and eighteen holes you can find your accommodation according to your own selection, even in hotels with own private chipping and putting greens. It can be highly recommended to book the tee time sufficiently in advance as this golf

course is very popular mainly for German tourists, who represent the vast majority of visitors. After successful golf it can be recommended to taste Tyrolean specialties in the clubhouse restaurant.

After golf and cruise on the Achensee Lake you can visit silver mines or to take a cableway to nearby peaks. Mountain hikes are organized for each day of the week from May 2 until October 28,

suffice to communicate your participation in advance. The participation in hikes is free of charge. For sure, avid hikers should participate in the 24-hour hike, held this year on 25th and 26th June around the Sonnjoch peak. In about 18 hours you would walk a distance of 56 km, for more details please visit [www.wandern.achensee.info](http://www.wandern.achensee.info). In this region, there are more than 450 km marked tourist routes.

Cyclists can enjoy more than 180 km and mountain cyclists more than 250 km marked routes, Achensee is located on the long distance cyclist route from Bavaria to Austria to the Inn river valley.

For runners and Nordic walking wait 183 km of marked routes and 250 marked routes for climbers.

In Pertisau, you can find accommodation from very simple holiday apartments up to 4 and 5\*hotels with excellent wellness. We have decided to stay in the family run, cosy and sporty Lebensfreude bei Furtners (Enjoy Life with Furtners) Sporthotel, [www.furtners.at](http://www.furtners.at) .

The hotel is located very close to the first and eighteen holes of the Achensee golf course and as other facilities, has own chipping and putting greens. During our stay the hotel owner, Mr. Furtner, prepared in person Tyrolean specialties on barbecue for his guests. We have also appreciated the excellent offer of fine wines as well as the wine of the week during our stay. You can even select your own menu for your arrival day at the hotel Internet site.

Close to Pertisau it is worth to visit silver mines in Schwaz, mining started there in middle ages in 1409, this mine represented at that time the mining center of Europe as well as the Swarovski Crystal Worlds in Waltens, designed by André Heller. Crystal Worlds is the second mostly visited tourist attraction in Austria.

In case you would like to come to Achensee during winter, besides downhill skiing you can select from a very broad offer of marked cross country routes.

Holiday in Austrian Tyrol by the lake Achensee in summer or winter can be only recommended. Very rich offer of leisure time activities can satisfy even the most demanding visitors.
